

Product recall „Zaddox Stub handlebar“

Wiehl, 14.06.2022

Dear Motea customer,

within the scope of our continuous product monitoring and quality control, serious indications have arisen in individual cases that the stub handlebar with the article no. A110610 represent a safety risk. In individual cases, the weld seam **breaks** during the ride. This can lead to a loss of control and consequently to an accident.

Motea GmbH places the highest value on quality and the safety of its products. **Therefore, as a precaution, Motea GmbH hereby recalls the affected handlebar for a refund of the full purchase price.**

You can use the free return label that you can create at <https://retoure.motea.de/> for the return.

For your own interest, please stop using your motorbike as long as the handlebar is mounted. This also applies in the event that you do not notice any abnormalities on the handlebar.

We thank you in advance for your active participation, understanding and trust and apologise for any inconvenience caused.
